

Addendum # 2

Addendum Date July 18, 2016

Request for Proposals # 2721

Title Lynnwood Link Light Rail Consulting Services

Due Date July 25, 2016, 2:00pm PDT

Contact Sarah Yeckley, syeckley@LynnwoodWA.gov

This Addendum #2 is produced to respond to vendor questions regarding this RFP.

1. I have one additional question. Is it the intent of the scope to provide actual “design peer review” for each of the disciplines identified in addition to “permit approval review”? The RFP appears to be asking for both levels of review while this process is clearly identified for the purpose of “expedited permit review”.

The Consultant, in coordination with City staff, will provide project design review at the 30, 60, and 90 percent submittal milestones, as well as representing the City in providing feedback and concurrence from all disciplines on design and code issues that may arise through the “over-the-shoulder” design review process. Each of the 30, 60, and 90 percent design review submittals will be reviewed against a pre-determined set of criteria appropriate for the level of design detail expected at each milestone. Sound Transit may elect to participate in an expedited permit review process when final plans are submitted for permitting, in which the Consultant may be retained to oversee.

All other terms and conditions of the solicitations remain unchanged
